

Format your usb with FAT32, do not with NTFS

Download openPLI from:

<https://openpli.org/download/zgemma/H17+combo/>

Download the first one: **openpli-develop-h17-20241021_usb.zip**

Downloads for the Zgemma H17 combo

Attention!

Downloads labeled **multiboot** can not be flashed in the traditional way, you need to flash them into a multiboot slot of the receiver using the "Flash Image" menu option.

OpenPLi » Develop builds

openpli-develop-h17-20241021_usb.zip	2024/10/21 23:36 - 72.85MB
openpli-develop-h17-20241021_multiboot.zip	2024/10/21 23:36 - 66.79MB
openpli-develop-h17-20241020_usb.zip	2024/10/20 17:19 - 72.86MB
openpli-develop-h17-20241020_multiboot.zip	2024/10/20 17:19 - 66.78MB

After download it, extract/unzip the zip file, copy all to the pendrive/usb stick

Put the usb stick into the box usb slot

Keep pressing the re-set key on rear panel, at the same time, use other hand to make box white button power on

The re set key show on:

After make power on, and keep pressing re set key for 2 to 3 seconds, and loose pressing, and the display will show " FLASH" word, and let it flash automatically , after flashing and the new image will re star
